

**Older Open ARC Administered Grants
OIG Report 15-20**

May 4, 2015

May 4, 2015

To: Federal Co-Chair
ARC Executive Director
ARC General Counsel
ARC Program Manager

From: Hubert Sparks, Inspector General

Subject: OIG Report 15-20, Open Older ARC Administered Grants

The attached draft report updates Report 14-41, dated September 30, 2014.

Of particular significance are the grants for which no change was noted and grants with expired end dates for which expenditures after the end date would be considered ineligible per ARC and Federal Guidelines.

Thus, the primary recommendations pertain to follow-up on grants with limited or no disbursements and grants with expired end dates to obtain justified and documented performance period extensions where applicable or closing and de-obligations.

Older Open ARC Administered Grants OIG Report 15-20

Background

This report updates Report 14-41, September 30, 2014 that identified seven grants for follow-up based on limited reported disbursements and 12 grants with expired performance periods and ARC balances. This report also identifies additional grants for follow-up due to no or limited ARC disbursements, expired performance periods, and zero balances.

Information in ARC.Net (ARC Grant Management System) was used to determine grant status, including actions initiated.

Results

ARC actions to follow-up on ARC with limited disbursements continued including resolving issues involving older projects and utilizing ARC.Net to further assist staff with tracking status of grants.

Follow-up on Report 14-41, dated September 30, 2014

No change was noted with respect to five grants with no ARC disbursements and balances totaling \$203,500 that were approved prior to 10/1/11 (table A). Table A also includes one grant for \$100,000 in this category that was not included in the prior report.

One of two grants with limited activity noted in the prior report was closed and no change was noted for one grant with a balance of \$231,241 (table C).

With respect to twelve open grants noted as having expired end dates no change was noted in eleven instances with balances of \$333,642 (table D).

Additional Grants for Follow-up

Seven additional open grants approved between 10/1/11 and 3/31/13 and having no reported ARC disbursements for periods ranging from 29 to 36 months of approval were identified. The balances of these grants was \$927,042 (table B). Action initiated to de-obligate \$137,696 for one grant.

Table C identifies 19 grants with small balances and/or no recent disbursements with balances totaling \$1,303,909. Action initiated to de-obligate \$205,061 for one grant.

In 72 instances, including 11 of 12 grants identified in prior report, end dates had expired. In 18 cases ARC disbursements were reported after the established end dates and in 17 instances no disbursements had been made. The balances of these grants totaled \$4,079,771 (table D).

As noted in prior reports costs incurred after end dates are considered ineligible and subject to recovery. The ARC Grant Administration Manual states “ARC will not reimburse expenditures occurring before or after the grant period and grant period extensions should be requested and approved by ARC before the grant period expires”.

Federal grant regulations that ARC generally follow specifies that, with exceptions, there can be a one-time extension of the expiration date of the award up to 12 months. For one time extensions, the recipient must notify the Federal awarding agency in writing with the supporting reasons and revised expiration date at least 10 days before the expiration date specified in the award. The one-time extension may not be exercised merely for the purpose of using un-obligated balances.

If extensions are approved un-obligated balances can be carried over to subsequent funding periods.

We did not attempt for this report to identify grantee expenditures made after performance periods expired but the potential exists for grantee expenditures to be incurred after performance periods ended, particularly where performance periods ended many months prior to ARC disbursements and the end dates were not extended.

Excluding RLF, investment related, and LDD Administrative grants 21 grants with zero balances, including 19 CO grants were identified for follow-up and potential closing (Table E).

Recommendations:

1. Follow-up identified grants with no disbursements within 30 months of grant approval and establishment of an automated control that identifies grants in this category for timely follow-up to obtain grant status, including closing and de-obligation.
2. Follow-up on grants identified with for lengthy periods between disbursements and/or smaller balances in relation to grants approved to determine potential for closing and de-obligation.
3. To avoid ineligible disbursement of grant funds controls should be established to identify, on a timely basis, expiration of performance periods and needed actions, including justified and documented extensions of performance periods or termination of grants.
4. Grantees should be notified of the need to request and justify extensions prior to the expiration of agreed with performance periods, coordinator monitoring of these end dates should be included in ARC guidelines, an automated control that highlights forthcoming open

grant end dates should be included in ARC.Net and language in the ARC Grant Administration Manual should be changed to “shall” rather than “should” with respect to grant periods.

5. Follow-up on grants with zero balances.
